

Ayesha

Final-Year B.E. Computer Engineering Student · Mumbai University · Expected Graduation 2027

PROFILE

Computer Engineering student with hands-on experience across full-stack development, data science, machine learning, cybersecurity and Python. Interested in building practical, polished software products and learning quickly in collaborative engineering environments.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, Dart, SQL
Development: React, Vite, Spring Boot, Flask, Flutter, REST APIs
Data & AI: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow
Tools & Platforms: Git, GitHub, Docker, PostgreSQL, Firebase, Render

PROJECTS

eQMS 360 — Electronic Quality Management System with role-based access, document workflows, revisions, approvals, audit logs and reporting.

EngiRoot — Flutter-based engineering college recommendation and comparison app using CET-oriented structured data.

FinGuard Credit Risk Assessment System — Credit risk assessment project using data-driven features and an application-oriented workflow.

Project Repository Portal — Web platform for student project submission, guide allocation, progress tracking and external evaluation.

Superstore Profitability Analysis — Python-based exploratory analysis of sales, profit, categories and regional business patterns.

Classroom Companion — Google Classroom-inspired application for classroom workflows, assignments and student-teacher interaction.

INTERNSHIPS & TRAINING

Vinayaka IT — Data Science & Machine Learning, 3 months

EduTantra — Cyber Security, 3 months

IBase7 — Python learning/training

CERTIFICATIONS

Python Programming · Generative AI · Power BI · Cyber Security
